

# iGrafx® ACCELERATORS 2009

## Accelerators:

- iGrafx PCF Accelerator
- iGrafx BPTF Accelerator
- iGrafx ITSM Accelerator

## Features:

- Rapid definition of enterprise business and process architectures
- Compliance and gap analysis
- Industry benchmarking

*iGrafx Accelerators enable Enterprise Business Architects utilizing iGrafx Enterprise Modeler to define enterprise models more quickly and ensure that they're aligned with appropriate industry standards and published enterprise frameworks.*

**Align with an industry framework**

iGrafx Accelerators are used in the context of iGrafx Enterprise Modeler to rapidly define enterprise models inclusive of business and process architectures. By linking an enterprise model with one or more frameworks, compliance and gap analysis is possible and organizations can focus process improvement efforts in areas that are competitive differentiators. In addition, alignment with some enterprise frameworks, e.g. Process Classification Framework, poises organizations to benchmark their performance with industry peers.

**The following Accelerators are available:**

### iGrafx PCF Accelerator 2009

This Accelerator is predicated on the APQC Process Classification Framework<sup>SM</sup> (PCF) developed as an open standard to facilitate improvement through process management and benchmarking, regardless of industry, size, or geography. The PCF organizes operating and management processes into 12 enterprise level categories, including process groups and over 1,000 processes and associated activities. For more information regarding the PCF, visit [www.apqc.org](http://www.apqc.org).

### iGrafx BPTF Accelerator 2009

This Accelerator is predicated on the VCG Business Process Transformation Framework (BPTF) developed by the non-profit Value Chain Group for the establishment of business architectures encompassing best-in-class business process management, methodology and IT blueprinting. The standard framework promotes consensus and helps drive continuous improvement and transformation of processes. For more information regarding the BPTF, visit [www.value-chain.org](http://www.value-chain.org).

### iGrafx ITSM Accelerator 2009

This Accelerator facilitates IT Service Management (ITSM), a discipline for managing information technology (IT) systems philosophically centered on the customer's perspective of IT's contribution to the business. This Accelerator correlates ISO 20000, COBIT, and ITIL® principles into a cohesive framework designed to assist in the implementation of effective IT governance throughout an enterprise. For more information regarding ITSM, ISO 20000, COBIT, and ITIL, visit [www.itsmfi.org](http://www.itsmfi.org), [www.ansi.org](http://www.ansi.org), [www.isaca.org](http://www.isaca.org), and [www.itil-officialsite.com](http://www.itil-officialsite.com) respectively.
