

For Immediate Release

Altima Technologies partners with iGrafx to Offer Network Design and Documentation Solution for iGrafx

NetZoom for iGrafx Provides Networking Professionals with a Simplified Method for Creating Accurate Network Documentation

Portland, OR and Glen Ellyn, IL - February 4, 2004 — The iGrafx division of Corel Inc., a leading provider of business process modeling and management tools and services, and Altima Technologies, Inc., a leading provider of innovative products and services that enhance software applications for designing and documenting networks, today announced the immediate availability of NetZoom for iGrafx, a comprehensive IT network design and documentation solution for IT, network, and telecommunications professionals. The combination of Altima's comprehensive content library with port-level intelligence and iGrafx robust documentation and analysis capabilities enables users to quickly visualize and document complex IT networks.

"Corporate managers today are demanding greater integration between operational professionals and IT. NetZoom for iGrafx enables both groups to use a common product to help bridge the communication gap," says Mark Stanford, Director of Program Management at iGrafx.

"The coupling of Altima's NetZoom for iGrafx with its extensive library of more than 55,000 intelligent network equipment shapes from over 1200+ manufacturers and the intelligent documentation capabilities of iGrafx sets a new standard for network documentation," says Sara Clark, President, Altima Technologies, Inc.

Key Features of NetZoom for iGrafx.

NetZoom for iGrafx works with any of the iGrafx desktop products including iGrafx FlowCharter, a leading process mapping and diagramming tool. The combination of iGrafx and NetZoom for iGrafx enables network designers to create and maintain an unprecedented level of network documentation by providing intelligence, power, and ease of use that is uniquely available with NetZoom. Just some of the powerful highlights include:

- **Comprehensive Content Library** of more than 55,000 network, telecommunications, infrastructure, and computer equipment shapes that are updated on a regular basis to keep up with changing technology.
- **Port-Level Connectivity** allows users to create port-to-port network documentation.
- **Custom Chassis Configuration with Related Equipment Information** enables system designers to accurately document the network with exact replicas of the filled chassis.
- **Automatic Equipment Rendering** allows for substantial reduction in file size, enhancing collaboration across the Internet.
- **Unique Pallet Options** enables users to gain immediate access to different views and to find specific equipment by sorting according to a range of attributes or creating their own custom pallet.

Pricing and Availability

An English-language version of the NetZoom for iGrafx is available immediately and requires one of the iGrafx desktop products. Product options available for purchase are:

- NetZoom for iGrafx Standard Option (12-Month Subscription included) is priced at US\$399 with a \$299 Renewal Option.
- NetZoom for iGrafx Professional Option (Includes Standard Option plus Quarterly CD Updates) priced at US\$ 499 with a \$399 Renewal Option.

Renewal Options are needed so that users may continue to update product and manufacturer libraries. An Equipment Shape Subscription permits web download of all new and customer requested shapes 24x7. For more information about the product, please visit
